## About Clearview

Clearview is the premier innovator of next-generation SharePoint-based Enterprise Content Management (ECM) solutions designed for today's demanding business world. Our leadership team combines years of experience with the latest Microsoft technology architecture and innovation to bring to market a new standard of excellence for ECM solutions, services, and Customer care.

*We were truly impressed by the new Clearview Iriss Desktop Gadget technology. We thought that the Iriss would have such a positive impact on how our users interact with documents and content on the desktop that we recently selected the Clearview ECM solution over products offered by alternative vendors.*

*The Iriss provides a fast and easy way for end users to access archived documents. This will enable greater use of the image (content) solution platform across our company, providing greater efficiency and improved transaction quality.*

**Bill W. Jones, President**  
Branson Bank

## Enterprise Content Management has never been this much fun!

The innovative *Iriss* floats on your desktop waiting to be activated

One of the most intriguing and exciting aspects of the new Clearview™ 4 Enterprise Content Management (ECM) solution is the revolutionary Clearview *Iriss* Desktop Gadget. The *Iriss* is designed to promote widespread usage of basic content management across every desktop in your organization without high deployment or training costs.

With the *Iriss* Desktop Gadget, documents can be easily accessed from virtually any desktop business application without complex scripting or programming. The *Iriss* truly changes the way your information workers access business information, so you can enhance business decisions, enable collaborative efficiencies, and elevate levels of Customer service.

## Value and Benefits

The *Iriss* Desktop Gadget promotes a new and simple user experience that has never been seen before in the ECM market. Information workers will not only be able to quickly access or store information with unprecedented ease, but they will have fun with the technology too!

- To promote maximum deployment for casual users, the *Iriss* Desktop Gadget can interact with either the full-featured Windows rich Clearview Client, the thin Web Client, or function independently as a standalone, lightweight ECM desktop application, complete with its own built-in content viewer.
- With a user experience inspired by the Windows Vista™ operating system, yet built to also run on your current Windows XP desktops, the *Iriss* Desktop Gadget can be set at varying levels of opacity (from transparent to opaque) to provide a quiet, distraction-free service that is ever-ready to retrieve or store your organization's content.
- Search criteria can be quickly and easily selected from virtually any business application running on the Windows desktop environment, and then dropped onto the *Iriss* for immediate access. This delivers out-of-the-box integration with your business applications without implementing expensive and complex programming or custom scripting interfaces.
- Documents, email messages, and other content objects can be effortlessly stored in Clearview using familiar drag-and-drop techniques.
